October 16, 2024

Mashpee Water District Customers,

Mashpee water district PWSID# 4172039 has conducted a service line inventory during 2023 and 2024. The inventory was conducted by Water District staff and an outside consultant. The verification methods for this survey include, records review, meter replacement program, water main and service repairs, visual inspection during system maintenance, and institutional memory from previous and current MWD staff. Upon completion of this survey it has been determined that none of the water service lines in the district contain any lead or galvanized service lines requiring replacement.

As of October 16, 2024 the MassDep has approved our service line inventory.

Mashpee Water District services contain no lead or galvanized requiring replacement service lines. If you have any questions about this inventory, please contact me or Mike Fredericks.

Best Regards,

Andy Marks

Operations Manager
